The Confirmed Date is critical to pay attention to

What do I do if the Confirmed Date is more than two days in the past?

1. Suppliers must create a New Order Confirmation
2. New Order Confirmation must include an updated delivery date

Creating the ASN before goods ship is important

Why is it so important? And what happens if I create the ASN after the goods ship?

- Creating the ASN after goods ship defeats the purpose of the ASN which is to inform us in advance of goods shipping
- This can cause receiving issues or halt operations and production
- This can cause warehouse space/capacity issues with goods piling up at the dock which cannot be received
