

**Which business is in scope?**

All businesses are in scope except for Terminals vendors.

**Which local markets are in scope?**

All local markets are targeted for migration excluding VF India.

**Will the suppliers only be enabled for a specific local market or for all?**

Once a supplier is enabled, they will receive all their POs through Ariba regardless of the Local Market.

**When will suppliers be onboarded to Ariba Network?**

The enablement will happen in waves, it follows the country scoping of integrating sourcing and purchasing on Ariba, but suppliers currently using EHub are being enabled earlier due to decommissioning of EHub in Feb 2018.

**Why is a supplier being reached out when their market P2O GoLive is only at a later stage e.g. next year?**

If a supplier is extended to do business on multiple local markets, then they are being reached out at the phase of the earliest market they do business with and not where they do most business with.

**Is invoicing in scope for Ariba?**

Invoicing is not yet in scope, it will most likely come at a later stage, only sourcing and purchasing is in scope for the change at the moment. Current invoicing tools remain available for the suppliers.

**What shall suppliers do if they invoice on Ehub/Taulia currently?**

Current invoicing options remain available. If you're using ehub/E2open currently, you may continue to do that, but only for invoicing. Taulia remains an available option for invoicing also.

**Is Goods Receipt information available on Ariba?**

Not at the moment, it will probably be available at a later stage.

**Will suppliers be contacted to enable them in local languages?**

Yes, suppliers targeted for full enablement will be contacted by Ariba in the local languages. Ariba can support all Vodafone languages.

**What will happen with suppliers that are not complying with registration?**

All suppliers will have to receive their POs through Ariba, suppliers that are not registering on time will be switched to receive their POs in email from Ariba, letting them to self-register themselves on Ariba if they want to.

**How much will it cost to the supplier to use Ariba Network?**

It is free for the supplier to do business with Vodafone, Vodafone takes care of all costs. Fees may apply if supplier is trading with other of its customers through Ariba.

**What will happen with new suppliers?**

New suppliers will be automatically registered to Ariba also to receive their purchase orders through Ariba Network.

**Is Goods Receipt information available on Ariba?**

Not at the moment, it will probably be available at a later stage.

**When can suppliers upload their catalogues? How is the catalogue process change?**

Catalogue enablement will happen at a later stage. The onboarding agents will connect with suppliers to help them complete the catalogue enablement.

**What shall suppliers do on Ariba?**

Suppliers receiving their POs on Ariba Network. They can accept the order by confirming it, partially accepting it, rejecting it, raise shipment notice on it etc. All actions depend of suppliers' contract. If they were not required to confirm the order before they are not required to do it now either. Contracts are not changing, only the platform Vodafone will use to transmit their POs.
