# Supplier Enablement in Ariba

Aligned with Air Canada's ambition to be a leading global carrier in everything we do, we are implementing a suite of SAP Ariba® modules to enhance our procurement capabilities. This will make procurement faster, easier, and more accurate, not only for us at Air Canada but also for our suppliers.

The Air Canada Supplier Enablement team is available to help guide you through the following key activities:

Strategy & Planning Pre-Enablement Activities	Supplier Registration	Supplier Education

Benefits for Suppliers:

- Real-Time PO delivery
- Supplier line cards via online catalog usage
- Automated invoicing via the 3-way match process
- Real-time visibility to PO and payment information
- Simple and accurate electronic invoicing and payment activities
- Business growth potential with new customers by leveraging the Ariba Network

Types of Enablement:

- There are no fees for Standard account suppliers
- Suppliers that would like more advanced options with larger volumes of transactions may opt for a fee-based Enterprise account
- To learn more about Standard and Enterprise accounts, please visit SAP Ariba Subscriptions and Pricing
