

Cisco Smart Buy / SAP Ariba Supplier Information

The following information is provided for suppliers conducting business with Cisco via the Ariba Network

As part of Cisco's digital procurement strategy to continuously improve efficiencies and to bring higher quality of service to our suppliers, Cisco is moving away from paper-based transactions with a fully digitized modern end-to-end buying experience based on technology from SAP Ariba. This change is being implemented in phases and will require suppliers doing business with Cisco to join the [Ariba Network](#). More detailed information about this effort can be found in the information below.

CATALOG

Catalogs are text files stored on the Ariba Network (CIF) or on your own website (PunchOut) that describe your products, services, and prices. This allows customers to easily place orders with your company. You can access catalog guides and documentation from the resource list below.

INTEGRATION – Coming Soon

Ariba Network offers the possibility to integrate with your back-end ERP system via cXML or EDI, for automatic exchange of electronic documents. You can access integration guides from the resource list below. Integrated suppliers should also reference the Ariba Network Supplier Guide to configure a test account; testing is required for cXML and EDI transactions.
