

Setting Up, Maintaining & Creating Standard Account Users

- Greyed out tabs, sections or selections indicate that you are no able to access
- Use the Dashboard to resend the Purchase Order Email
- Real time invoice status notifications

Users– General Information

There is a limited range of Account Settings that a supplier can use within the User's selection. Supplier can Enable assignment of orders to users with limited access to the Ariba Network. However, in order to perform this assignment of tasks Roles must be created first, then Users created. Only your organisation Ariba Network System Administrator will have the Users selection in the drop down box and can create roles and users.

The screenshot shows the 'Ariba Network' interface. At the top, there is a dark blue header with the text 'Ariba Network' on the left and 'Company Settings' with a dropdown arrow on the right. Below the header is a white section titled 'Account Settings' with 'Save' and 'Close' buttons on the right. Underneath, there are four tabs: 'Customer Relationships', 'Users' (which is selected and underlined), 'Notifications', and 'Application Subscriptions'. The main content area is titled 'Manage Users' and includes a sub-header 'Manage users for your Ariba account. If you enter an email alias, specify the alias owner's name and phone number.' Below this is a table with columns: 'Username ↑', 'Email Address', 'First Name', 'Last Name', 'Ariba Discovery Contact', 'Role Assigned', and 'Customer Assigned'. The table is currently empty, showing 'No items'. A 'Create User' button is located below the table. Further down, there is a section titled 'Manage Assignments for Users with Limited Access' with a checkbox and the text 'Enable assignment of orders to users with limited access to Ariba Network.' Below that is the 'Manage User Roles' section, which includes a sub-header 'Create and manage roles for your account. You can view or edit the details of a role. The Administrator role can be viewed, but cannot be modified.' This section contains a table with columns 'Name' and 'Actions'. The 'Administrator' role is listed with a 'Details' link. At the bottom, there is a 'Create Role' button.
