- The Catalog User Interface
- Uploading and Publishing New Catalogs
- Replacing Existing Catalogs
- Questions

The Catalog Upload **Process**

The Catalog Upload Process

The Catalog Upload Process

- When you upload a Catalog for your Customer, you are loading the file to Ariba Network (AN)—**not** directly to your Customer's Catalog
- Once the file is loaded to the Network, your Customer is notified that a Catalog has been loaded
- The Catalog will then be validated, audited and sent for Approval
- If **Approved**, it will be Activated and available for Users
- If **Rejected**, it will be returned to the Supplier for corrections, and the process starts over again

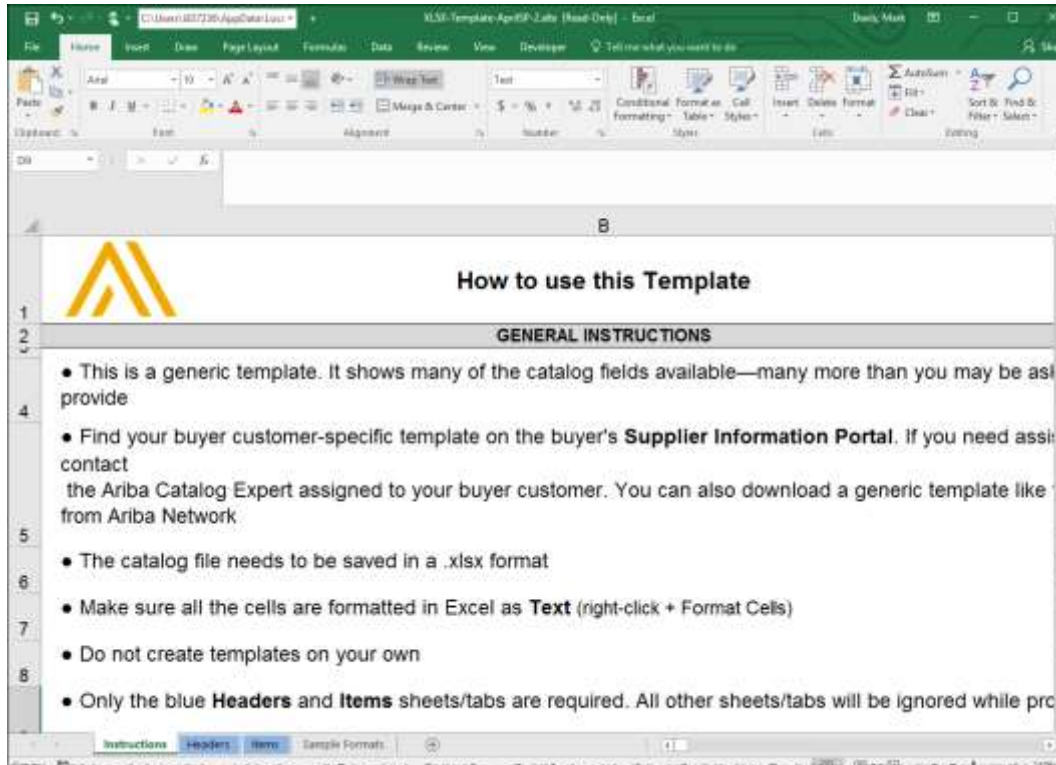

The Catalog Template

The Catalog Template

- Both Static and PunchOut Catalogs use Catalog Templates
- Static Catalogs are generally created offline and uploaded to the Ariba Network
- PunchOut Catalogs **can** be created offline, but there is also a Wizard on the Network to create PunchOut Catalog files—these are special static files called “Index Files”.

The CIF Catalog Template

CIF Catalogs are the most common type of static Catalogs. For ease of CIF Catalog creation, we provide Suppliers with an Excel XLSX template. The Supplier then creates and uploads the Catalog file to Ariba Network. Below is a sample of an XLSX CIF Template:

- The Template has 4 tabs—2 data tabs for **Header** and **Items**, and 2 tabs for **Instructions** and **Samples**
- Only the **Header** and **Items** tabs will be processed—all other tabs will be ignored by the system. These tabs can be deleted

The CIF Catalog Template

The CIF Template is color coded and has Tool Tips that provide information about how to treat each field.

Each Template includes specific instructions, including custom fields or other requirements set by your Coca Cola Bottler.

	D	E	F	G	H	I	J	K	L	M	
	Unit Price	Unit of Measure	Short Name	Required					Image		Mark
									Normal	Detailed	
	45.10	EA	4-Line Phone	U	Short title for the item. Do not use duplicate information in Short Name and Item Description. Instead, use Short Name to name the product, and Item Description to describe product details. Type: String Length: 80 characters				c. http://www.abc.	http://www.abc.com/277	T
	22.58	EA	Excel 97 for Dummies	U					http://www.abc.com/2772901/img.gif		IE
	20.53	DZN	Blue Ballpoint Pens	U					c. http://www.abc.	http://www.abc.com/277	IE
	3.55	GRO	Manilla Folders	U					http://www.abc.com/2772903/img.gif		IDG

Rivets, 1	10.20	EA	Round-Ring Binder	U					http://www.abc.com/2772905/img.gif		

FIELD COLOR CODES	
	Required
	Optional, but Desired
	Optional

The CIF Template and instructions are provided to Suppliers as part of this education and can also be found on the your Coca Cola Bottler Supplier Portal page on the AN.

The CIF Catalog Template

When creating a Catalog, follow these general Template rules:

- Make sure all the cells are formatted in Excel as Text (right-click + Format Cells)
- Do not create templates on your own
- Only the blue **Headers** and **Items** sheets/tabs are required. All other sheets/tabs will be ignored while processing. These tabs can be deleted
- Populate data in the **Header** sheet/tab
- Populate data in the **Items** sheet/tab (Remove the sample data provided in the template)
- For some complex fields such as **ClassificationCode**, some of the sub-fields (e.g. **Domain**) may be required. These are indicated in Blue, and are only required if the parent field is present

Creating a CIF Catalog

Creating a CIF Catalog

General Rules

- All fields marked “Required” must be populated
- Supplier Part Numbers must be unique per item
- Commodity Codes must be assigned to each item

Best Practices

- Data should be submitted in “Sentence case”—using both upper and lower case letters—not in ALL CAPS or all lower case text
- Abbreviations should be kept to a minimum—if you have the space, spell it out
- Be descriptive in the **Description** field—all the words are indexed for ease of finding the items
- Use different **Short Names** not just repeating a **Description**—it makes it easier for Users, and you get an additional 80 characters to describe your item
- Always include images

Creating a CIF Catalog

The Header Tab

	A	B	
1	LOADMODE:	F	
2	SUPPLIERID_DOMAIN:	NetworkID	
3	UNUOM:	TRUE	
4	CURRENCY:	USD	
5	COMMENTS:	Any comments can go here.	
6			
<div><div></div><div></div><div>Instructions</div><div>Headers</div><div>Items</div><div>Sample Formats</div></div>			

- **LOADMODE— Required** - F (Full) or I (Incremental) The tool tip explains how Incremental loads work
- **SUPPLIERID_DOMAIN— Required** - Specifies the Domain used. The preferred value is the Supplier's Ariba Network ID Number—"NetworkID". Other values include "DUNS", "internalsupplierid" or custom values
- **UNUOM— Optional but preferred** - If set to "TRUE", the Unit Of Measure is set to UNUOM (United Nations Unit of Measure); if set to "FALSE", the value is set to ANSI. (Ariba recommends UNUOM)
- **CURRENCY— Optional but preferred** - Specifies the currency used for the prices. The value "USD" (United States Dollar) is here by default and can be changed to a different currency
- **COMMENTS— Optional** - This field can be used for comments related to your catalog. It is a good place to enter the Supplier Name, the Customer Name and Catalog Name

Note: The **Header** contains information that applies to the entire file. You can see that the only required fields are the **LOADMODE** and **SUPPLIERID_DOMAIN**.

You can set **UNUOM** and **CURRENCY** at the item level in the file and they will override the values in the Header for that particular item.

Creating a CIF Catalog

The Items Tab

Supplier ID	Supplier Part ID	Unit of Measure
AN0199999999	2772882	EA
AN0199999999	2772967	EA
AN0199999999	2772276	DZN

Classification Codes-1		Classification Codes-2	
Domain	Value	Domain	Value
UNSPSC	43191504	Eclass 7.1	32-03-13-04
UNSPSC	55101509	Eclass 7.1	32-01-11-35
UNSPSC	44121704	Eclass 7.1	16-04-03-01

Attachments-1	
Source	Description

Detail

- For **Compound** fields, the designation for whether or not the field is required is at **both** the **Header** and **Detail** level of the field

Attachments-1	
Source	Description
https://www.supplier.com/stibo/hires.pdf	Certificate of Analysis
https://www.supplier.com/stibo/hires.pdf	Certificate of Analysis

The field **Attachments-1** is optional

However, if you do use the field, then you must provide a **Source** and **Description** value

Creating a CIF Catalog

The Items Tab

Supplier ID	Supplier Part ID	Manufacturer Part ID
AN01999999999	12345	CFG 11562
AN01999999999	87690	87690-12
AN01999999999	479-56	A100-BLK

- **Supplier ID - Required**

Description: If the Header is set to “NetworkID”, then enter the Supplier’s Ariba Network ID, otherwise the appropriate value for the Domain used—DUNS, internalsystem, etc. Ask your Catalog Advisor if you have questions

Type of data: String

Maximum length: 255

Example: AN09067477712

Note: If you publish the Catalog in your test account, add a suffix –T to your ANID or DUNS number like this: AN09067477712-T

- **Supplier Part ID - Required**

Description: Part Number used by the Supplier. The Part Number must be unique for each item in the Catalog.

Type of data: String

Maximum length: 255

Example: 2772882

- **Manufacturer Part ID – Optional, but desired**

Description: A Part Number that a Manufacturer uses

Type of data: String

Maximum length: 255

Example: TTSIBM412CID

Creating a CIF Catalog

Item Description	Unit Price	Unit of Measure
Pens, Bic, Ballpoint, Blue, 1 dozen	3.48	EA
Stapler, Swingline, Black	12.95	EA
Post-It, Yellow, 1"x2", pad of 100	8.76	DZN
Folders, Letter, Manilla, 100	12.25	BX

▪ Item Description - Required

Description: Description of the product or service. Make your descriptions as clear and complete as possible (Item type, brand, model, color, etc.)

Type of data: String

Maximum length: 2000

Example: Printer, Laser, A4, Epson Stylus Color 740

▪ Unit Price - Required

Description: Customer-specific price

Type of data: Decimal

Example: 4.32 or 1234.78

Note: To separate the integer from the decimal, you must use a 'dot' and not a comma. Also, do not use a comma to indicate 'thousands'. Do not include any currency symbols such as \$, £ or ¥.

▪ Unit of Measure - Required

Description: Unit of measure related to the Unit Price. Use a United Nations UOM if the UNUOM in the Header is set to "True"

Type of data: String

Maximum length: 32

Example: BX

Note: A file containing the Units of Measure is available in your Customer's Supplier Information Portal

Creating a CIF Catalog

Lead Time	Manufacturer Name	Supplier URL
1	Manufacturer 1	http://www.supplier1.com/item.htm
2	Manufacturer 2	http://www.supplierA.com/item.htm
1	Manufacturer 3	
	Manufacturer 4	http://supplier.com/1234.htm

- **Lead Time - Required**

Description: Number of working days for the product to be shipped from the date you receive the Purchase Order

Type of data: Integer

Maximum length: 40

Example: 1

- **Manufacturer Name - Required**

Description: Name of the manufacturer

Type of data: String

Maximum length: 255

Example: Epson

- **Supplier URL – Optional, but desired**

Description: A URL that links to a Supplier static page about the item (could be a MSDS, construction info, packaging info, etc.)

Type of data: String

Maximum length: 255

Example: <http://www.supply.com/Catalog/product18.htm>

Creating a CIF Catalog

Manufacturer URL	Market Price
http://www.manu.com	12.95
	2296.56
	4.86
	12.86

- **Manufacturer URL – Optional, but desired**

Description: A URL that links to a Manufacturer's static page about the item (could be a MSDS, construction info, packaging info, etc.)

Type of data: String

Maximum length: 255

Example: <http://www.manu.com/Catalog/product18.htm>

- **Market Price – Optional, but desired**

Description: List or retail price.

Note: Does not show on the Ariba UI—this is an informational-only field for Suppliers

Type of data: Decimal

Example: 4.32 or 1234.78

Note: To separate the integer from the decimal, you must use a 'dot' and not a comma. Also, do not use a comma to indicate 'thousands'. Do not include any currency symbols such as \$, £ or ¥.

Creating a CIF Catalog

Classification Code-1		Classification Code-2	
Domain	Value	Domain	Value
UNSPSC	43191504		
UNSPSC	43191504		
UNSPSC	44122011		
UNSPSC	44122011		

■ Classification Code-1 – Required

Description: Classification of the product or service.

■ Detail: Domain – Required

Description: Use 'UNSPSC' if the Header specifies "UNSPSC" as the CODEFORMAT

Type of data: String

Maximum length: 40

Example: UNSPSC, Custom

■ Detail: Value – Required

Description: The classification code that corresponds to the product or service

Type of data: String

Maximum length: 40

Example: 45678900 (level 3) and 45678923 (level 4)

Note: Ariba supports UNSPSC Version 13.5. A code list is available in your Customer's Supplier Information Portal.

■ Classification Code -2 – Optional

Description: *Secondary* classification of the product or service.

■ Detail: **Domain – Required** (details same as above)

■ Detail: **Value – Required** (details same as above)

Creating a CIF Catalog

Short Name
Soft Drink, Soda, Dr Pepper
Dairy, Milk, 1% milkfat
Coffee, Dark Roast, Starbucks
Soft Drink, Juice, Minute Maid

- **Short Name - Required**

Description: Short description of the item. The Short Name is displayed first in the UI, and is in a larger type face and blue color. You can use the Short Name to describe a category or Item type, then give the specifics in the Item Description

Type of data: String

Example: Nylon Glove, Blue

Maximum length: 80 characters

Creating a CIF Catalog

Supplier Part Auxiliary ID	Language	Currency
1234-75	en_US	USD
	en_US	USD
	en_US	USD
	en_US	USD

▪ Supplier Part Auxiliary ID – Optional

Description: Uniquely identifies a single item. For example, items in multiple languages or available in multiple units of measure

Type of data: String

Maximum length: 255

Example: 1234 French

Note: If any items have the same reference (Supplier Part ID column), this column allows you to differentiate them

▪ Language – Optional (If blank, defaults to 'en_US')

Description: Specifies the language used to describe the item.

Type of data: String

Maximum length: 255

Example: en_US

Note: A listing of language codes is in your Customer's Supplier Information Portal

▪ Currency – Optional (Can be set as a default value in Header)

Description: Specifies the currency used for the prices

Type of data: String

Maximum length: 32

Example: USD, CAD (Canadian Dollar)

Note: A listing of currency codes is in your Customer's Supplier Information Portal

Creating a CIF Catalog

587.jpg		http://www.1.com/587.Jpg
http://www.1.36.jpg		http://www.1.36.jpg

■ Image – Optional, but desired

Description: URL of the item's image (preferred), or filename of the image (sent in a zip file)

Supported image formats: JPG, JPEG, GIF, PNG, BMP—(JPG preferred)

■ Detail: **Thumbnail – Optional** (If **Image** is used, at least one Detail is required)

Description: URL of an Icon-size image of the item, or filename of the image (sent in the zip file)—can be different from the product's full-size Image

Type of data: String

Maximum length: 255

Reccomended Size: 85 x 85 pixels

Note: If the "Thumbnail" field is left blank, the file in the "Image" field will be resized and populate the Thumbnail

■ Detail: **Normal - Optional** (If **Image** is used, at least one Detail is required)

Description: URL of an image of the item, or filename of the image (sent in the zip file)

Type of data: String

Maximum length: 255

Reccomended Size: 250 x 250 pixels

■ Detail: **Detailed - Optional** (If **Image** is used, at least one Detail is required)

Description: URL of an image of the item, or filename of the image (sent in the zip file)

Type of data: String

Maximum length: 255

Reccomended Size: 250 x 250 pixels

Creating a CIF Catalog

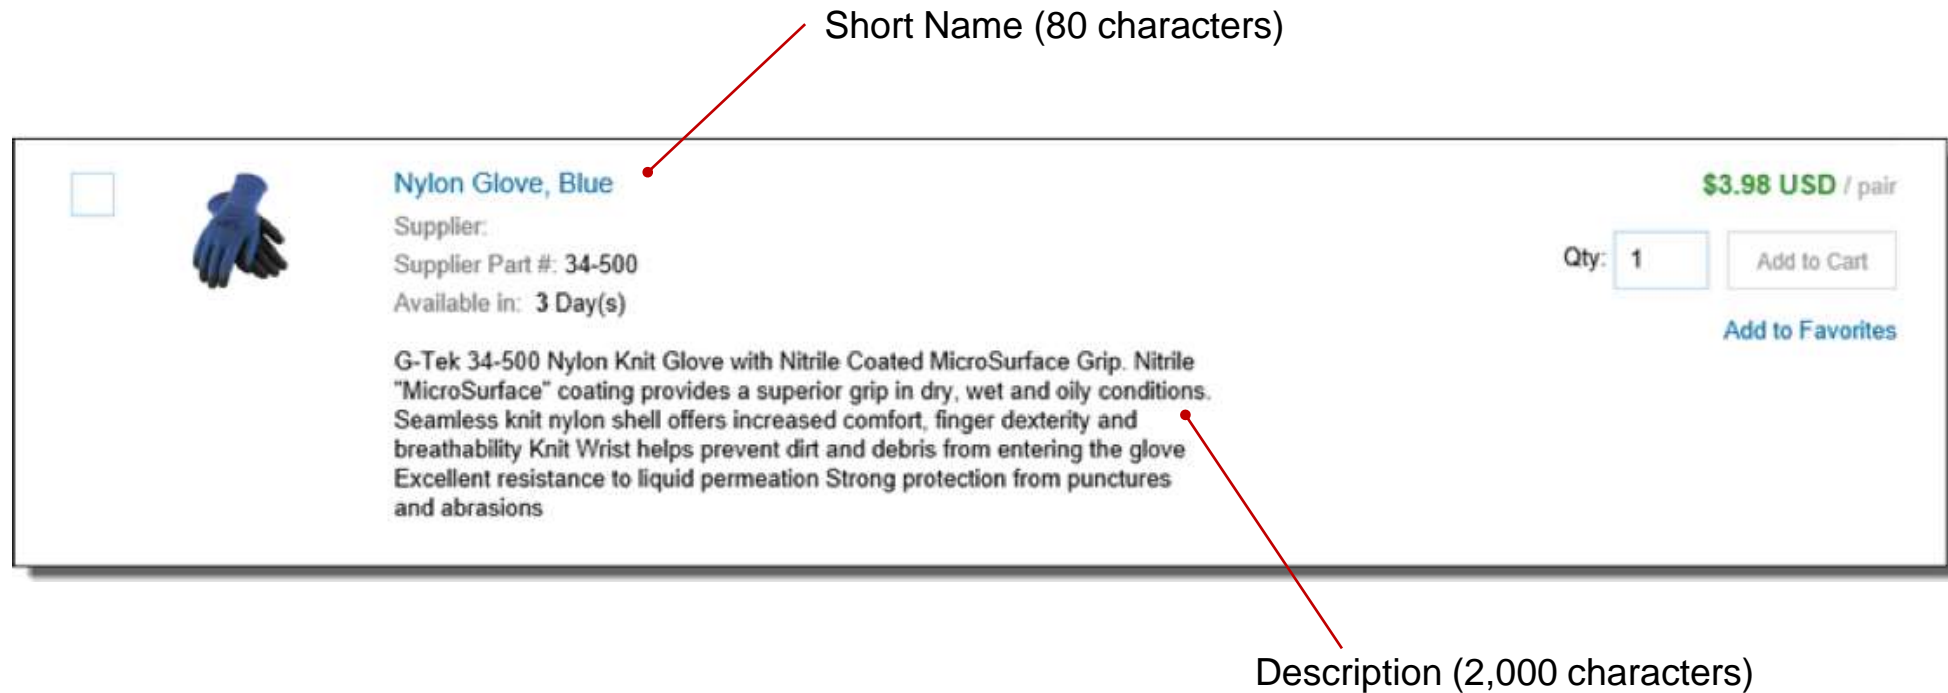

Special Notes for Images

- In the Catalog file, you can refer to a **remote** image—using a URL—or you can refer to a **local** image, and send that image to Ariba to store
- Using **remote** images is preferred
 - Be sure the URL in the Template is *complete* (including http://)
Example: http://server/directory/imagefilename.jpg
 - Point to the image itself—not a program that serves up images
- If you use **local** images
 - Be sure the filename in the Template is *exact*—including upper and lower case characters
Example: FileName.jpg -or- lowercasename.jpg
 - Load images in a zip file format with the Customer Name and Supplier Name on the AN

The Catalog **User Interface**

The Catalog Interface Item View

This is how a static Catalog item is displayed in the standard Catalog interface. Clicking on the Short Name takes you to the Details screen for this item.

The screenshot displays a catalog item card for 'Nylon Glove, Blue'. On the left, there is a small square icon and a larger image of a blue glove. To the right of the images, the item name 'Nylon Glove, Blue' is shown in blue text. Below the name, the supplier information is listed: 'Supplier:', 'Supplier Part #: 34-500', and 'Available in: 3 Day(s)'. Further down, a detailed description of the glove is provided. On the right side of the card, the price '\$3.98 USD / pair' is displayed in green. Below the price, there is a quantity selector set to '1' and an 'Add to Cart' button. At the bottom right, there is a link to 'Add to Favorites'. Two red arrows point to specific parts of the card: one points to the item name 'Nylon Glove, Blue' and the other points to the detailed description text.

The Catalog Interface Detail View

This is a how a static Catalog Item Detail view is displayed in the normal Catalog interface.

Additional
Information,
links and
custom fields

The screenshot displays the SAP Catalog Item Detail View for a 'Nylon Glove, Blue'. The breadcrumb navigation at the top reads: « Back | Catalog Home / Miscellaneous / Defense and Law Enforcement and Security and Safety Equipment and Supplies / Personal Safety and Protection. On the left, there is an image of a blue glove with an 'Enlarge' link below it. To the right of the image, the item title 'Nylon Glove, Blue' is shown. Below the title, a table lists key attributes: Supplier (blank), Supplier Part # (34-500), Manufacturer (G-Tek), Manufacturer Part # (34-500), and Available in (3 Day(s)). To the right of this table, the price is displayed as '\$3.98 USD / pair', with a quantity input field set to '1' and buttons for 'Add to Cart' and 'Add to Favorites'. Below these elements, the 'Product Description' section contains a detailed paragraph about the glove's features. The 'Product Specifications' section follows, containing a table with the same attributes as the one above. At the bottom, there is a 'Description' field and a link to the manufacturer's website: 'http://www.hivissupply.com/g-tek-34-500-nylon-knit-gloves.html'. A red arrow points from the text 'Additional Information, links and custom fields' to the 'Product Specifications' table.

Uploading and Publishing New Catalogs

- Switch to your Test Account
 - Your Catalog should be loaded and tested in your Test Account. (*Note: If you are instructed to load a Catalog to a Production account, just skip this step*)
 - Find your name and click for the pull down menu, then click “Switch To Test ID”
 - If you don’t see a “Switch to Test ID” link, your Test account has not yet been set up. Contact your Ariba Network Administrator

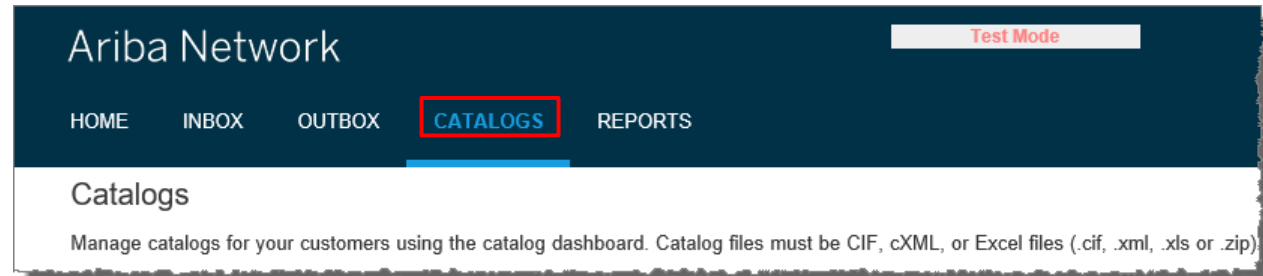

- You will get a warning. **“You are about to switch to Test Mode.”** Click “OK”

Uploading and Publishing New Catalogs

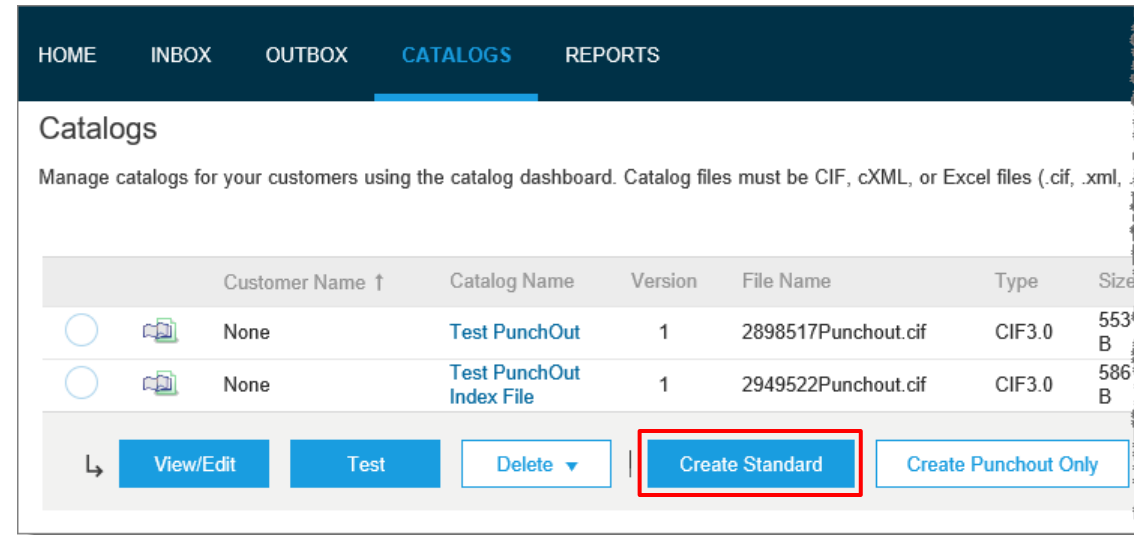

- When uploading a Catalog on Ariba Network, there are four steps you will follow:
 1. **Uploading**—Transfers the Catalog file from your local drive to Ariba Network. During the upload process, you enter the Catalog name (this becomes the “Subscription Name” in the Buyer’s local Catalog) descriptive text, and classify it so that buying organizations that are looking for specific products and services can find your Catalog
 2. **Setting Visibility**—Allows you to specify whether the Catalog version is “Public” or “Private” and determines which of your Customers can access it
 3. **Validating**—The Network checks the Catalog for errors, checks for zero price values and does a high-level validation of UNSPSC codes and Units of Measure
(Note: Customer-specific validation rules for UNSPSC and UOM codes, and zero price values can be more detailed and much more strict than the high-level Network validations, therefore your Catalog may **pass** the Network validations but **fail** the Customer-specific validations for these same items)
 4. **Publishing**—Freezes the current version and notifies your Customer of the Catalog’s availability

Uploading and Publishing New Catalogs

- Navigate to the Catalogs Tab

- On the Catalogs screen, click the “Create Standard” button

Uploading and Publishing New Catalogs

- You are now on the **Create a New Catalog** Screen
- To create the Catalog, there is a 3-step Wizard:
 - ① **Details**—General information about the Catalog
 - ② **Subscriptions**—Who you are publishing the Catalog to
 - ③ **Content**—Uploading the actual Catalog file

- Click “Next”

The screenshot shows the 'Create a New Catalog' wizard. On the left, a sidebar lists three steps: 1 Details (selected), 2 Subscriptions, and 3 Content. The main area is for the 'Details' step, with instructions: 'Enter a catalog name and descriptive text. Customers can search using this information. Add commodity codes to your catalog. * indicates required field'. Fields include 'Catalog Name' (required), 'Created By' (set to 'Catalog Manager'), 'Date Created' (set to 'Tuesday 30 Aug 2016 18:59 PM GMT-07:00'), and a large 'Description' text area (1000 characters left). Below these is a 'Commodities' section with a table header 'Description' and a 'No items' message. At the bottom right, there are 'Next' and 'Exit' buttons.

Uploading and Publishing New Catalogs

① Details

- **Catalog Name:** This becomes the “Subscription Name” for this Catalog that **will not change**. The format for this Name is set by your Coca Cola Bottler use this format (no special characters are allowed, you can use a dash (-) or underscore(_)):
 - **SupplierName_CatalogType_Region**
- **Description:** (*Optional*) Brief description of the content of your Catalog
- **Commodities:** (*Optional*) The UNSPSC code(s) that corresponds to the items family/ group of your Catalog. Use the “Add” button to find the code
- When you complete this screen, click “Next”

Create a New Catalog

Uploading and Publishing New Catalogs

③ Content

- Select your **Catalog File Format** to “Excel” by clicking the pull down menu and selecting the option
- Select your **Catalog File**, by clicking “Browse” and pointing to your file
- Load any **Image or Attachment Files** by clicking “Browse” and pointing to your file
- After you have selected your Catalog file, click the “Validate and Publish” button

The screenshot shows the 'Create a New Catalog' interface, specifically the 'Content' step (Step 3 of 3). The left sidebar shows 'Details', 'Subscriptions', and 'Content', with 'Content' being the active step. The main area is titled 'UPLOAD YOUR CATALOG AND ATTACHMENT FILES'. It contains a 'Catalog File Format' dropdown menu set to 'CIF', a 'Catalog File' input field with a 'Browse...' button, and an 'Images and Attachments File' input field with a 'Browse...' button. A red rectangle highlights these three elements. Below them is a yellow warning box with the text: '! After you click, Validate and Publish, please wait for the catalog to finish uploading. Large catalogs may take several minutes to upload and you will be redirected to the catalogs page upon completion'. At the bottom of the form, a blue 'Validate and Publish' button is highlighted with a red rectangle. 'Previous' and 'Exit' buttons are located in the top right corner.

- As your Catalog loads, the status will read “Validating”. Click the “Refresh” button at the bottom of the screen to see the status change

Uploading and Publishing New Catalogs

■ Catalog Validation

- After the Network completes validation, it changes the Catalog status from “Validating” to one of the following statuses:
 - **Validated, Published, Activated or Pending Buyer Validation**—your Catalog is error-free
 - **Validation Errors Found by Customer**—The Customer’s Validation rules have run and there is a problem
 - **Bad Format**—your Catalog failed the file validation check. Audit the file for problems in format
- A Catalog with an error status means you need to review the error results and correct them before going on

Catalogs

Manage catalogs for your customers using the catalog dashboard. Catalog files must be CIF, cXML, or Excel files (.cif, .xml, .xls or .zip). Some customers might have defined specific catalog validation rules, [More](#)

	Customer Name ↑	Catalog Name	Version	File Name	Type	Size	Visibility	Created By	Date Created	Status	Date Status Received
	None	Test PunchOut	1	2898517Punchout.cif	CIF3.0	553 B		Catalog Manager	Apr 2014	Validated	
	Buyer Name	Buyer Test CIF	1	99089.cif	CIF3.0	4 KB	Private	Catalog Manager	5 Jan 2017	3 Errors Found by Ariba Network	
	Buyer Name	Buyer Test CIF	1	BuyerCat.cif	CIF3.0	2 KB	Private	Catalog Manager	30 Jun 2015	Pending Buyer Validation	
	Buyer Name	Buyer Test CIF	1	Catalog.cif	CIF3.0	2 KB	Private	Catalog Manager	11 Nov 2013	Published	

Uploading and Publishing New Catalogs

- **Catalog Validation - continued**
 - To see the error detail, click on the **Errors Found** hyperlink:

Uploading and Publishing New Catalogs

■ Viewing Validation Errors

- You will be taken to the company's catalog and will be able to see the validation rules that failed
- In this case, the customer is telling us that the **Supplier ID** is unknown, and the catalog is failing
- To correct any issues, go back to the original Excel Catalog file, make the corrections, then update the Catalog file, and reupload the new version to replace the existing Catalog

Uploading and Publishing New Catalogs

■ Customer Catalog Approval

- When your Catalog passes the Network upload validation, your Customer is then notified to audit, validate and approve your Catalog. The Network may show any of these statuses: **Published**, **Activated**, **Validated by Customer** or **Pending Buyer Validation**—*note that these are all valid statuses*
- If your Customer finds anything in your Catalog file that requires your attention, you will be notified by e-Mail
 - Corrections should be made to the original Excel file, then the corrected Catalog file needs to be uploaded to the Network
 - Each Catalog must pass both the validation and Customer audit before it can be loaded into the Customer's buying application and be available for their Users

Replacing Existing Catalogs

Replacing Existing Catalogs

To replace an existing Catalog, the steps are almost the same as uploading a new Catalog for the Customer.

- Log into your Ariba Network account
- Navigate to the **Catalogs** tab
- Find the existing Catalog you wish to replace with a new version
- Click on the radio button to select the existing Catalog
- Click the **View/Edit** button, or click on the **Catalog Name** hyperlink
 - When *replacing* an existing Catalog, do **not** Create a new Catalog—it is important to keep the **same** Catalog Name. The file name **can** be different

Catalogs

Manage catalogs for your customers using the catalog dashboard. Catalog files must be CIF, cXML, or Excel files (.cif, .xml, .xls or .zip). Some customers

	Customer Name ↑	Catalog Name	Version	File Name	Type	Size	Visibility	Created By
<input checked="" type="radio"/>	 None	Test PunchOut	1	2898517Punchout.cif	CIF3.0	553 B		Catalog Manager
<input type="radio"/>	 Buyer Name	Buyer Test CIF	1	99089.cif	CIF3.0	4 KB	Private	Catalog Manager
<input type="radio"/>	 Buyer Name	Buyer Test CIF	1	BuyerCat.cif	CIF3.0	2 KB	Private	Catalog Manager
<input type="radio"/>	 Buyer Name	Buyer Test CIF	1	Catalog.cif	CIF3.0	2 KB	Private	Catalog Manager

- Click the **Next** button

Replacing Existing Catalogs

- ② **Upload Catalog File**—The Network will display the Upload screen to upload the new version
- Select your **Catalog File Format** to “Excel” by clicking the pull down menu and selecting the option
 - Select your **Catalog File**, by clicking “Browse” and pointing to your file
 - Load any **Image or Attachment Files** by clicking “Browse” and pointing to your file

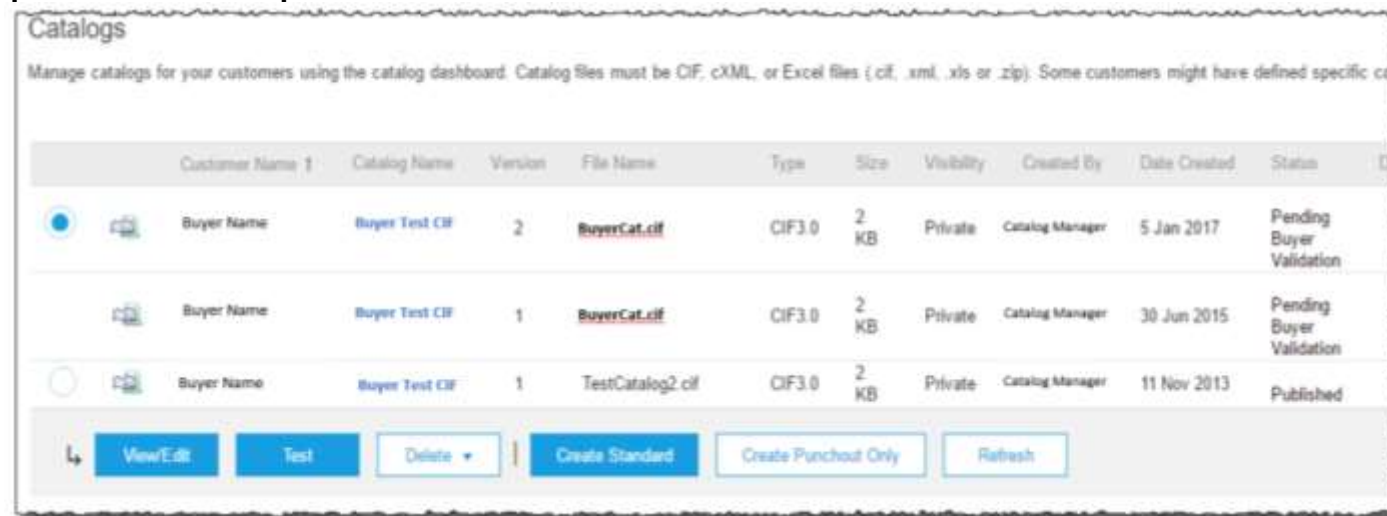

The screenshot shows the 'Edit a Catalog' interface. On the left, a sidebar contains three steps: '1 Details', '2 Upload Catalog File' (which is highlighted with a blue bar), and '3 Content'. The main area is titled 'UPLOAD YOUR CATALOG AND ATTACHMENT FILES'. It contains a 'Catalog File Format' dropdown menu set to 'CIF', a 'Catalog File' input field with a 'Browse' button, and an 'Images and Attachments File' input field with a 'Browse' button. These three elements are enclosed in a red rectangular box. Below this, a yellow warning box states: 'After you click, Validate and Publish, please wait for the catalog to finish uploading. Large catalogs may take several minutes to upload and you will be redirected to the catalogs page upon completion'. At the bottom of the main area, there is a blue 'Validate and Publish' button, also highlighted with a red rectangular box. In the top right corner of the interface, there are 'Previous' and 'Exit' buttons. At the very bottom, there is a link that says 'Download Templates/Guidelines'.

- ③ **Content**—After you have selected your Catalog file, click the **Validate and Publish** button
- As your Catalog loads, the status will read “Validating”. Click the **Refresh** button at the bottom of the screen to see the status change

Replacing Existing Catalogs

- When your Catalog passes the upload validation, the Network may show any of these statuses: **Published**, **Activated**, **Validated by Customer** or **Pending Buyer Validation**—*note that these are all valid statuses*. The upload is complete
