- Creating a CIF Catalog
- The Catalog User Interface
- Uploading and Publishing New Catalogs
- Replacing Existing Catalogs
- Questions

The Catalog Upload **Process**

The Catalog Upload Process

The Catalog Upload Process

- When you upload a Catalog for your Customer, you are loading the file to Ariba Network (AN)—**not** directly to your Customer's Catalog
- Once the file is loaded to the Network, your Customer is notified that a Catalog has been loaded
- The Catalog will then be validated, audited and sent for Approval
- If **Approved**, it will be Activated and available for Users
- If **Rejected**, it will be returned to the Supplier for corrections, and the process starts over again

The Catalog **Template**

The Catalog Template

- Both Static and PunchOut Catalogs use Catalog Templates
- Static Catalogs are generally created offline and uploaded to the Ariba Network
- PunchOut Catalogs **can** be created offline, but there is also a Wizard on the Network to create PunchOut Catalog files—these are special static files called “Index Files”.

The CIF Catalog Template

CIF Catalogs are the most common type of static Catalogs. For ease of CIF Catalog creation, we provide Suppliers with an Excel XLSX template. The Supplier then creates and uploads the Catalog file to Ariba Network. Below is a sample of an XLSX CIF Template:

- The Template has 4 tabs—2 data tabs for **Header** and **Items**, and 2 tabs for **Instructions** and **Samples**
- Only the **Header** and **Items** tabs will be processed—all other tabs will be ignored by the system. These tabs can be deleted

The CIF Catalog Template

The CIF Template is color coded and has Tool Tips that provide information about how to treat each field.

Each Template includes specific instructions, including custom fields or other requirements set by Gerdau.

| | D | E | F | G | H | I | J | K | L | M | |
|-----------|------------|-----------------|----------------------|----------|--|---|---|---|------------------------------------|------------------------|------|
| | Unit Price | Unit of Measure | Short Name | Required | | | | | Image | | Mark |
| | | | | | | | | | Normal | Detailed | |
| | 45.10 | EA | 4-Line Phone | U | Do not use duplicate information in Short Name and Item Description. Instead, use Short Name to name the product, and Item Description to describe product details. Type: String Length: 80 characters | | | | c. http://www.abc. | http://www.abc.com/277 | T |
| | 22.58 | EA | Excel 97 for Dummies | U | | | | | http://www.abc.com/2772901/img.gif | IE | |
| | 20.53 | DZN | Blue Ballpoint Pens | U | | | | | c. http://www.abc. | http://www.abc.com/277 | IE |

| FIELD COLOR CODES | |
|-------------------|-----------------------|
| Light Blue | Required |
| Light Green | Optional, but Desired |
| Light Yellow | Optional |

The CIF Template and instructions are provided to Suppliers as part of this education and can also be found on the Gerdau Supplier Portal page on the AN.

The CIF Catalog Template

When creating a Catalog, follow these general Template rules:

- Make sure all the cells are formatted in Excel as Text (right-click + Format Cells)
- Do not create templates on your own
- Only the blue **Headers** and **Items** sheets/tabs are required. All other sheets/tabs will be ignored while processing. These tabs can be deleted
- Populate data in the **Header** sheet/tab
- Populate data in the **Items** sheet/tab (Remove the sample data provided in the template)
- For some complex fields such as **ClassificationCode**, some of the sub-fields (e.g. **Domain**) may be required. These are indicated in Blue, and are only required if the parent field is present

Creating a CIF Catalog

Creating a CIF Catalog

General Rules

- All fields marked “Required” must be populated
- Supplier Part Numbers must be unique per item
- Commodity Codes must be assigned to each item

Best Practices

- Data should be submitted in “Sentence case”—using both upper and lower case letters—not in ALL CAPS or all lower case text
- Abbreviations should be kept to a minimum—if you have the space, spell it out
- Be descriptive in the **Description** field—all the words are indexed for ease of finding the items
- Use different **Short Names** not just repeating a **Description**—it makes it easier for Users, and you get an additional 80 characters to describe your item
- Always include images

Creating a CIF Catalog

The Header Tab

| | A | B | |
|---|--------------------|---------------------------|--|
| 1 | LOADMODE: | F | |
| 2 | SUPPLIERID_DOMAIN: | NetworkID | |
| 3 | UNUOM: | TRUE | |
| 4 | CURRENCY: | USD | |
| 5 | COMMENTS: | Any comments can go here. | |
| 6 | | | |

Instructions Headers Items Sample Formats

- **LOADMODE— Required** - F (Full) or I (Incremental) The tool tip explains how Incremental loads work
- **SUPPLIERID_DOMAIN— Required** - Specifies the Domain used. The preferred value is the Supplier's Ariba Network ID Number—"NetworkID". Other values include "DUNS", "internalsupplierid" or custom values
- **UNUOM— Optional but preferred** - If set to "TRUE", the Unit Of Measure is set to UNUOM (United Nations Unit of Measure); if set to "FALSE", the value is set to ANSI. (Ariba recommends UNUOM)
- **CURRENCY— Optional but preferred** - Specifies the currency used for the prices. The value "USD" (United States Dollar) is here by default and can be changed to a different currency
- **COMMENTS— Optional** - This field can be used for comments related to your catalog. It is a good place to enter the Supplier Name, the Customer Name and Catalog Name

Note: The **Header** contains information that applies to the entire file. You can see that the only required fields are the **LOADMODE** and **SUPPLIERID_DOMAIN**.

You can set **UNUOM** and **CURRENCY** at the item level in the file and they will override the values in the Header for that particular item.

Creating a CIF Catalog

The Items Tab

| Supplier ID | Supplier Part ID | Unit of Measure |
|--------------|------------------|-----------------|
| AN0199999999 | 2772882 | EA |
| AN0199999999 | 2772967 | EA |
| AN0199999999 | 2772276 | DZN |

| Classification Codes-1 | | Classification Codes-2 | |
|------------------------|----------|------------------------|-------------|
| Domain | Value | Domain | Value |
| UNSPSC | 43191504 | Eclass 7.1 | 32-03-13-04 |
| UNSPSC | 55101509 | Eclass 7.1 | 32-01-11-35 |
| UNSPSC | 44121704 | Eclass 7.1 | 16-04-03-01 |

| Attachments-1 | |

| Source | Description |
| https://www.supplier.com/stibo/hires.pdf | Certificate of Analysis |
| https://www.supplier.com/stibo/hires.pdf | Certificate of Analysis |

- Fields in the Items tab can be **simple** or **compound**

These are samples of simple fields with a single data element at the **Header** level

These are samples of compound fields—they have data elements at the **Header** and **Detail** level

Creating a CIF Catalog

| Supplier ID | Supplier Part ID | Unit of Measure |
|--------------|------------------|-----------------|
| AN0199999999 | 2772882 | EA |
| AN0199999999 | 2772967 | EA |
| AN0199999999 | 2772276 | DZN |

- **Simple** fields are color coded as to their requirements designation

| Classification Codes-1 | | Classification Codes-2 | |
|------------------------|----------|------------------------|-------------|
| Domain | Value | Domain | Value |
| UNSPSC | 43191504 | Eclass 7.1 | 32-03-13-04 |
| UNSPSC | 55101509 | Eclass 7.1 | 32-01-11-35 |
| UNSPSC | 44121704 | Eclass 7.1 | 16-04-03-01 |

Header

Detail

- For **Compound** fields, the designation for whether or not the field is required is at **both** the **Header** and **Detail** level of the field

| Attachments-1 | |
|---|-------------------------|
| Source | Description |
| https://www.supplier.com/stibo/hires.pdf | Certificate of Analysis |
| https://www.supplier.com/stibo/hires.pdf | Certificate of Analysis |

The field **Attachments-1** is optional

However, if you do use the field, then you must provide a **Source** and **Description** value

Creating a CIF Catalog

The Items Tab

| Supplier ID | Supplier Part ID | Manufacturer Part ID |
|--------------|------------------|----------------------|
| AN0199999999 | 12345 | CFG 11562 |
| AN0199999999 | 87690 | 87690-12 |
| AN0199999999 | 479-56 | A100-BLK |

- **Supplier ID - Required**

Description: If the Header is set to “NetworkID”, then enter the Supplier’s Ariba Network ID, otherwise the appropriate value for the Domain used—DUNS, internalsystem, etc. Ask your Catalog Advisor if you have questions

Type of data: String

Maximum length: 255

Example: AN09067477712

Note: If you publish the Catalog in your test account, add a suffix –T to your ANID or DUNS number like this: AN09067477712-T

- **Supplier Part ID - Required**

Description: Part Number used by the Supplier. The Part Number must be unique for each item in the Catalog.

Type of data: String

Maximum length: 255

Example: 2772882

- **Manufacturer Part ID – Optional, but desired**

Description: A Part Number that a Manufacturer uses

Type of data: String

Maximum length: 255

Example: TTSIBM412CID

Creating a CIF Catalog

| Item Description | Unit Price | Unit of Measure |
|-------------------------------------|------------|-----------------|
| Pens, Bic, Ballpoint, Blue, 1 dozen | 3.48 | EA |
| Stapler, Swingline, Black | 12.95 | EA |
| Post-It, Yellow, 1"x2", pad of 100 | 8.76 | DZN |
| Folders, Letter, Manilla, 100 | 12.25 | BX |

▪ Item Description - Required

Description: Description of the product or service. Make your descriptions as clear and complete as possible (Item type, brand, model, color, etc.)

Type of data: String

Maximum length: 2000

Example: Printer, Laser, A4, Epson Stylus Color 740

▪ Unit Price - Required

Description: Customer-specific price

Type of data: Decimal

Example: 4.32 or 1234.78

Note: To separate the integer from the decimal, you must use a 'dot' and not a comma. Also, do not use a comma to indicate 'thousands'. Do not include any currency symbols such as \$, £ or ¥.

▪ Unit of Measure - Required

Description: Unit of measure related to the Unit Price. Use a United Nations UOM if the UNUOM in the Header is set to "True"

Type of data: String

Maximum length: 32

Example: BX

Note: A file containing the Units of Measure is available in your Customer's Supplier Information Portal

Creating a CIF Catalog

| Lead Time | Manufacturer Name | Supplier URL |
|-----------|-------------------|---|
| 1 | Manufacturer 1 | http://www.supplier1.com/item.htm |
| 2 | Manufacturer 2 | http://www.supplierA.com/item.htm |
| 1 | Manufacturer 3 | |
| | Manufacturer 4 | http://supplier.com/1234.htm |

- **Lead Time - Required**
Description: Number of working days for the product to be shipped from the date you receive the Purchase Order
Type of data: Integer
Maximum length: 40
Example: 1
- **Manufacturer Name - Required**
Description: Name of the manufacturer
Type of data: String
Maximum length: 255
Example: Epson
- **Supplier URL – Optional, but desired**
Description: A URL that links to a Supplier static page about the item (could be a MSDS, construction info, packaging info, etc.)
Type of data: String
Maximum length: 255
Example: <http://www.supply.com/Catalog/product18.htm>

Creating a CIF Catalog

| Manufacturer URL | Market Price |
|---------------------|--------------|
| http://www.manu.com | 12.95 |
| | 2296.56 |
| | 4.86 |
| | 12.86 |

- **Manufacturer URL – Optional, but desired**

Description: A URL that links to a Manufacturer’s static page about the item (could be a MSDS, construction info, packaging info, etc.)

Type of data: String

Maximum length: 255

Example: <http://www.manu.com/Catalog/product18.htm>

- **Market Price – Optional, but desired**

Description: List or retail price.

Note: Does not show on the Ariba UI—this is an informational-only field for Suppliers

Type of data: Decimal

Example: 4.32 or 1234.78

Note: To separate the integer from the decimal, you must use a ‘dot’ and not a comma. Also, do not use a comma to indicate ‘thousands’. Do not include any currency symbols such as \$, £ or ¥.

Creating a CIF Catalog

| Classification Code-1 | | Classification Code-2 | |
|-----------------------|----------|-----------------------|-------|
| Domain | Value | Domain | Value |
| UNSPSC | 43191504 | | |
| UNSPSC | 43191504 | | |
| UNSPSC | 44122011 | | |
| UNSPSC | 44122011 | | |

▪ Classification Code-1 – Required

Description: Classification of the product or service.

▪ Detail: Domain – Required

Description: Use 'UNSPSC' if the Header specifies "UNSPSC" as the CODEFORMAT

Type of data: String

Maximum length: 40

Example: UNSPSC, Custom

▪ Detail: Value – Required

Description: The classification code that corresponds to the product or service

Type of data: String

Maximum length: 40

Example: 45678900 (level 3) and 45678923 (level 4)

Note: Ariba supports UNSPSC Version 13.5. A code list is available in your Customer's Supplier Information Portal.

▪ Classification Code -2 – Optional

Description: *Secondary* classification of the product or service.

▪ Detail: **Domain – Required** (details same as above)

▪ Detail: **Value – Required** (details same as above)

Creating a CIF Catalog

| Short Name |
|--------------------------------|
| Soft Drink, Soda, Dr Pepper |
| Dairy, Milk, 1% milkfat |
| Coffee, Dark Roast, Starbucks |
| Soft Drink, Juice, Minute Maid |

- **Short Name - Required**

Description: Short description of the item. The Short Name is displayed first in the UI, and is in a larger type face and blue color. You can use the Short Name to describe a category or Item type, then give the specifics in the Item Description

Type of data: String

Example: Nylon Glove, Blue

Maximum length: 80 characters

Creating a CIF Catalog

| Supplier Part Auxiliary ID | Language | Currency |
|----------------------------|----------|----------|
| 1234-75 | en_US | USD |
| | en_US | USD |
| | en_US | USD |
| | en_US | USD |

▪ Supplier Part Auxiliary ID – Optional

Description: Uniquely identifies a single item. For example, items in multiple languages or available in multiple units of measure

Type of data: String

Maximum length: 255

Example: 1234 French

Note: If any items have the same reference (Supplier Part ID column), this column allows you to differentiate them

▪ Language – Optional (If blank, defaults to 'en_US')

Description: Specifies the language used to describe the item.

Type of data: String

Maximum length: 255

Example: en_US

Note: A listing of language codes is in your Customer's Supplier Information Portal

▪ Currency – Optional (Can be set as a default value in Header)

Description: Specifies the currency used for the prices

Type of data: String

Maximum length: 32

Example: USD, CAD (Canadian Dollar)

Note: A listing of currency codes is in your Customer's Supplier Information Portal

Creating a CIF Catalog

Creating a CIF Catalog

Special Notes for Images

- In the Catalog file, you can refer to a **remote** image—using a URL—or you can refer to a **local** image, and send that image to Ariba to store
- Using **remote** images is preferred
 - Be sure the URL in the Template is *complete* (including http://)
Example: http://server/directory/imagefilename.jpg
 - Point to the image itself—not a program that serves up images
- If you use **local** images
 - Be sure the filename in the Template is *exact*—including upper and lower case characters
Example: FileName.jpg -or- lowercasename.jpg
 - Load images in a zip file format with the Customer Name and Supplier Name on the AN

The Catalog **User Interface**

The Catalog Interface Item View

This is how a static Catalog item is displayed in the standard Catalog interface. Clicking on the Short Name takes you to the Details screen for this item.

The screenshot shows a catalog item card for 'Nylon Glove, Blue'. On the left, there is a small square icon and a larger image of a blue nitrile glove. To the right of the image, the text reads: 'Nylon Glove, Blue' (highlighted with a red arrow), 'Supplier:', 'Supplier Part #: 34-500', and 'Available in: 3 Day(s)'. Below this is a detailed description: 'G-Tek 34-500 Nylon Knit Glove with Nitrile Coated MicroSurface Grip. Nitrile "MicroSurface" coating provides a superior grip in dry, wet and oily conditions. Seamless knit nylon shell offers increased comfort, finger dexterity and breathability Knit Wrist helps prevent dirt and debris from entering the glove Excellent resistance to liquid permeation Strong protection from punctures and abrasions' (highlighted with a red arrow). On the right side of the card, the price is '\$3.98 USD / pair', the quantity is '1' in a text box, and there are buttons for 'Add to Cart' and 'Add to Favorites'.

Short Name (80 characters)

Description (2,000 characters)

The Catalog Interface Detail View

This is a how a static Catalog Item Detail view is displayed in the normal Catalog interface.

The screenshot displays a catalog item detail page for a 'Nylon Glove, Blue'. The breadcrumb navigation at the top reads: 'Back | Catalog Home / Miscellaneous / Defense and Law Enforcement and Security and Safety Equipment and Supplies / Personal Safety and Protection'. On the left, there is an image of a blue nitrile glove with an 'Enlarge' link below it. The main title is 'Nylon Glove, Blue'. To the right of the title, the price is '\$3.98 USD / pair'. Below the price, there is a quantity input field set to '1', and buttons for 'Add to Cart' and 'Add to Favorites'. The product details section includes: Supplier (redacted), Supplier Part #: 34-500, Manufacturer: G-Tek, Manufacturer Part #: 34-500, and Available in: 3 Day(s). The 'Product Description' section contains a detailed paragraph about the glove's features. The 'Product Specifications' section lists the same details as above. At the bottom, there is a 'Description' field and a link to the manufacturer's website: 'http://www.hivissupply.com/g-tek-34-500-nylon-knit-gloves.html'.

Additional Information, links and custom fields

Uploading and Publishing New Catalogs

Uploading and Publishing New Catalogs

- Login to Ariba Network
 - Go to: <http://supplier.ariba.com>
 - Log in with your Username and Password

The screenshot displays the SAP Ariba 'Supplier Login' interface. At the top, the header reads 'SAP Ariba Orders & Invoices Powered by Ariba Network' with a 'Help Center' link. The main content area is dark blue. On the left, the 'Supplier Login' section contains a 'User Name' input field, a 'Password' input field, and a blue 'Login' button, all enclosed in a red rectangular box. Below the login fields is a link for 'having trouble logging in?'. To the right, a promotional banner for 'MiSUMi invoicing: 3 days to 5 minutes' features a small video thumbnail and a 'Learn More' button. The bottom of the page includes a footer with 'Supported browsers and plugins', the SAP logo, and copyright text: '© 1996–2016 Ariba, Inc. All rights reserved. Data Policy Security Disclosure Terms of Use'.

Uploading and Publishing New Catalogs

- Switch to your Test Account
 - Your Catalog should be loaded and tested in your Test Account. (*Note:* If you are instructed to load a Catalog to a Production account, just skip this step)
 - Find your name and click for the pull down menu, then click “Switch To Test ID”
 - If you don’t see a “Switch to Test ID” link, your Test account has not yet been set up. Contact your Ariba Network Administrator

- You will get a warning. **“You are about to switch to Test Mode.”** Click “OK”

Uploading and Publishing New Catalogs

- When uploading a Catalog on Ariba Network, there are four steps you will follow:
 - 1. Uploading**—Transfers the Catalog file from your local drive to Ariba Network. During the upload process, you enter the Catalog name (this becomes the “Subscription Name” in the Buyer’s local Catalog) descriptive text, and classify it so that buying organizations that are looking for specific products and services can find your Catalog
 - 2. Setting Visibility**—Allows you to specify whether the Catalog version is “Public” or “Private” and determines which of your Customers can access it
 - 3. Validating**—The Network checks the Catalog for errors, checks for zero price values and does a high-level validation of UNSPSC codes and Units of Measure
*(Note: Customer-specific validation rules for UNSPSC and UOM codes, and zero price values can be more detailed and much more strict than the high-level Network validations, therefore your Catalog may **pass** the Network validations but **fail** the Customer-specific validations for these same items)*
 - 4. Publishing**—Freezes the current version and notifies your Customer of the Catalog’s availability

Uploading and Publishing New Catalogs

- Navigate to the Catalogs Tab

- On the Catalogs screen, click the “Create Standard” button

Uploading and Publishing New Catalogs

- You are now on the **Create a New Catalog** Screen
- To create the Catalog, there is a 3-step Wizard:
 - ① **Details**—General information about the Catalog
 - ② **Subscriptions**—Who you are publishing the Catalog to
 - ③ **Content**—Uploading the actual Catalog file

- Click “Next”

② Subscriptions

- You determine which Customers will subscribe to your Catalog
- Set the Visibility to **Private**. You can select a single customer.
- To select Gerdau check the box next to the **Customers** column.
- If the customer is not listed, it means that they have not established a relationship with your company yet. This is required prior to uploading a Catalog to them
- Your customer may have established some validation rules that your catalog must pass. To view these rules, click **View** in the **Catalog Validation Rule** column. You will be taken to the company's catalog and will be able to see the validation rules

- Here we see the Validation rules that your customer has in place for catalogs
- For this customer, there are three rules that must be followed: Image, Short Name and Manufacturer Part ID fields are required
- To view more information about the rule, you can click on the **Action**, pull down, then click **View**
- When you are finished viewing the customer's rules, click the **Done** button

UPLOAD YOUR CATALOG AND ATTACHMENT FILES

Catalog File Format: CIF
Catalog File: Browse...
Images and Attachments File: Browse...

! After you click, Validate and Publish, please wait for the catalog to finish uploading. Large catalogs may take several minutes to upload and you will be redirected to the catalogs page upon completion

Validate and Publish

- As your Catalog loads, the status will read “Validating”. Click the “Refresh” button at the bottom of the screen to see the status change

Uploading and Publishing New Catalogs

■ Catalog Validation

- After the Network completes validation, it changes the Catalog status from “Validating” to one of the following statuses:
 - **Validated, Published, Activated or Pending Buyer Validation**—your Catalog is error-free
 - **Validation Errors Found by Customer**—The Customer’s Validation rules have run and there is a problem
 - **Bad Format**—your Catalog failed the file validation check. Audit the file for problems in format
- A Catalog with an error status means you need to review the error results and correct them before going on

Catalogs

Manage catalogs for your customers using the catalog dashboard. Catalog files must be CIF, cXML, or Excel files (.cif, .xml, .xls or .zip). Some customers might have defined specific catalog validation rules, [More](#)

| | Customer Name ↑ | Catalog Name | Version | File Name | Type | Size | Visibility | Created By | Date Created | Status | Date Status Received |
|--|-----------------|--------------------------------|---------|------------------------------|--------|-------|------------|-----------------|--------------|---------------------------------|----------------------|
| | None | Test PunchOut | 1 | 2898517Punchout.cif | CIF3.0 | 553 B | | Catalog Manager | Apr 2014 | Validated | |
| | Buyer Name | Buyer Test CIF | 1 | 99089.cif | CIF3.0 | 4 KB | Private | Catalog Manager | 5 Jan 2017 | 3 Errors Found by Ariba Network | |

Uploading and Publishing New Catalogs

■ Viewing Validation Errors

- You will be taken to the company's catalog and will be able to see the validation rules that failed
- In this case, the customer is telling us that the **Supplier ID** is unknown, and the catalog is failing
- To correct any issues, go back to the original Excel Catalog file, make the corrections, then update the Catalog file, and reupload the new version to replace the existing Catalog

The screenshot shows a web interface for a catalog. At the top, it says "Content Subscription: [redacted] CIF containing one item". Below this is a button "See Items With Warnings". A table below the button has columns: "Supplier Id", "Supplier Part Id", "Shop at", and "Manufacturer". The first row of the table has the value "1" in the first column, "EXPC0412" in the "Supplier Id" column (which is highlighted with a yellow border), "AAA" in the "Supplier Part Id" column, and empty cells for "Shop at" and "Manufacturer". Below the table, a modal dialog box is open with the title "Supplier ID is unknown" and a close button (X). The dialog contains a warning icon (a yellow triangle with an exclamation mark) and a text input field containing "EXPC0412". At the bottom of the dialog are "OK" and "Cancel" buttons. Below the dialog, in the main interface, are "Cancel" and "Revalidate" buttons.

Uploading and Publishing New Catalogs

■ Customer Catalog Approval

- When your Catalog passes the Network upload validation, your Customer is then notified to audit, validate and approve your Catalog. The Network may show any of these statuses: **Published**, **Activated**, **Validated by Customer** or **Pending Buyer Validation**—*note that these are all valid statuses*
- If your Customer finds anything in your Catalog file that requires your attention, you will be notified by e-Mail
 - Corrections should be made to the original Excel file, then the corrected Catalog file needs to be uploaded to the Network
 - Each Catalog must pass both the validation and Customer audit before it can be loaded into the Customer's buying application and be available for their Users

Replacing Existing Catalogs

Replacing Existing Catalogs

To replace an existing Catalog, the steps are almost the same as uploading a new Catalog for the Customer.

- Log into your Ariba Network account
- Navigate to the **Catalogs** tab
- Find the existing Catalog you wish to replace with a new version
- Click on the radio button to select the existing Catalog
- Click the **View/Edit** button, or click on the **Catalog Name** hyperlink
 - When *replacing* an existing Catalog, do **not** Create a new Catalog—it is important to keep the **same** Catalog Name. The file name **can** be different

| Catalogs | | | | | | | | |
|--|-----------------|----------------|---------|---------------------|--------|-------|------------|-----------------|
| Manage catalogs for your customers using the catalog dashboard. Catalog files must be CIF, cXML, or Excel files (.cif, .xml, .xls or .zip). Some customers | | | | | | | | |
| | Customer Name ↑ | Catalog Name | Version | File Name | Type | Size | Visibility | Created By |

Buttons: View/Edit, Test, Delete, Create Punchout Only, Refresh

Replacing Existing Catalogs

- You are now taken to the **Edit a Catalog** Screen
- You see 3 steps here also
 - ① **Details**—Most of the fields are pre-populated with the existing information, but you can add a new Description for the updated Catalog

The screenshot shows the 'Edit a Catalog' interface. On the left, a navigation pane has three steps: '1 Details' (highlighted with a red box), '2 Content', and '3 Subscriptions'. The main area displays catalog metadata: 'Catalog Name: Cif Catalog', 'File Name: BuyerCat.cif', 'Created By: Catalog Manager', 'Date Created: Tuesday 30 Jun 2015 7:53 AM GMT-07:00', 'Version: 1', 'Size: 2 KB', 'Item Count: 5', 'Type: CIF3.0', and 'Status: Published'. Below this, the 'Description' field is highlighted with a red box and contains the text 'Updated Catalog with new pricing - January 2017'. A character count shows 'Characters left: 953'. A note states 'The maximum number of characters allowed is 1000, including spaces.' At the bottom, there is a 'Commodities' section with a search icon, a 'Description' header, and 'No items' listed. Below this are 'Delete' and 'Add' buttons. The 'Next' button at the top right is highlighted with a blue box.

- Click the **Next** button

Replacing Existing Catalogs

- ② **Upload Catalog File**—The Network will display the Upload screen to upload the new version
 - Select your **Catalog File Format** to “Excel” by clicking the pull down menu and selecting the option
 - Select your **Catalog File**, by clicking “Browse” and pointing to your file
 - Load any **Image or Attachment Files** by clicking “Browse” and pointing to your file
