

Dear Valued Supplier,

As previously announced, we have been working hard on the implementation of the new CONA Services initiative to streamline our procurement processes. As you know, CONA Services is collaborating with SAP Ariba® to fulfill our vision to improve our cloud-based procurement and payables operations for our CONA Bottler community.

We now are planning to Go Live with the SAP Ariba Buying and Invoicing solution on **May 23, 2022**. Additionally, our project's SAP Ariba supplier enablement strategy will change as part of each supplier's transition from legacy catalog procurement &/or Taulia to the SAP Ariba Network. This strategy will involve a "waved deployment" approach that best fits both our CONA bottling customers and their suppliers' Change Management processes. In the coming weeks, the CONA 2.0 ARIBA project team will work with each supplier on an individual basis to determine their appropriate project Go-Live deployment through the remaining portion of calendar year 2022. Regardless of a supplier's Go Live date for SAP Ariba Network, the **CONA 2.0 ARIBA project team will be working now** with all suppliers to ensure that each supplier has the guidance and support to be ready prior to their scheduled Go Live. Accordingly, the CONA 2.0 ARIBA project team requests that all suppliers continue to remain engaged with our project participants so we can move forward effectively and efficiently to meet our common project goals.

Please be on the lookout for additional communications in the coming weeks. As always you can contact [CONA Ariba Supplier Enablement](#) or our project's [CONA Services Supplier Information Portal](#) with any additional questions that you may have.

Thank You all for your support and collaboration!

Kind Regards,

CONA Services Supplier Enablement Team on behalf of our Coca-Cola Bottling Partners
